REGISTRATION

Students should register at the Junior College office before the Fall Quarter opens.

FALL QUARTER

Preliminary Registration.....	September 3
Instruction Begins.....	September 6
Last Day to Register and Receive Full Credit.....	September 23
Last Day to Withdraw and Receive "W" Without Grade.....	September 30
Armistice Day Vacation.....	November 11
Quarter Ends.....	November 23
Thanksgiving Vacation.....	November 24, 25

WINTER QUARTER

Instruction Begins.....	November 28
Last Day to Withdraw and Receive "W" Without Grade.....	September 30
Christmas Vacation.....	December 19 to January 1
Classes Resume.....	January 2
Last Day to Withdraw and Receive "W" Without a Grade.....	January 6
Washington's Birthday Vacation.....	February 22
Quarter Ends.....	March 3

SPRING QUARTER

Instruction Begins.....	March 6
Last Day to Register and Receive Full Credit.....	March 24
Last Day to Withdraw and Receive "W" Without Grade.....	March 31
Spring Vacation.....	April 5, 6, 7
Memorial Day Vacation.....	May 30
Quarter Ends.....	June 9

GENERAL INFORMATION

HISTORY AND ORGANIZATION

The Centralia Junior College, the oldest junior college in the State of Washington, is a co-educational college with courses leading to a junior college diploma. It was established in Centralia in September, 1925, under the sponsorship of the school board. It became a part of the public school system of the state in 1941.

The State Board of Education, in accordance with a provision of law, has designated the Board of Education of School District No. 401 as the governing body of the college.

The college derives its support from state appropriations and student fees.

ACCREDITATION

The work of the Centralia Junior College is accredited by the University of Washington, Washington State College, the three Colleges of Education and the State Board of Education.

The Centralia Junior College is a member of the Northwest Association of Secondary and Higher Schools as a two-year junior college, grades thirteen and fourteen.

LIBRARY FACILITIES

The college has built up a reference library suited to the needs of students enrolled in the various courses. The books are housed in the college library under the supervision of a trained librarian. Students also have access to the city libraries of Centralia and Chehalis, both which contain many books of value as reference material.

LABORATORIES

The college has laboratories fully equipped for all the sciences included in the curriculum; namely, Botany, Chemistry, Physics, Physiology and Zoology.

GYMNASIUM

Centralia's beautiful and modern gymnasium is available for basketball and the various sports given in the Physical Education classes for both men and women.

ADMINISTRATION

ADMISSION TO THE JUNIOR COLLEGE

The only requirement for admission to the junior college is graduation from a high school, evidence of good character, and ability to do college work.

ADMISSION TO FRESHMAN STANDING

A student who has been graduated from an accredited four-year high school in the State of Washington may enter the college upon presentation of satisfactory credentials from his high school. If he has been graduated from an accredited high school, he may, upon completion of two years of satisfactory work in the junior college, enter an institution of higher learning without difficulty. Students from out of the state must meet the same requirements as those who enter from Washington schools.

ADMISSION TO ADVANCED STANDING

Students who have been regularly matriculated in a standard college or university, or in an accredited junior college, will be admitted to the Centralia Junior College upon presentation of official transcript of their college records, accompanied by a statement of honorable dismissal. A complete transcript of all work done in high school must also be presented.

SPECIAL STUDENTS

Students who are not graduates of a high school, but who are capable of doing college work, may register for college courses. Credits for such work cannot be transferred to another college until the student has completed the requirements for high school graduation.

VETERANS EDUCATION

The Centralia Junior College is an approved institution for the education of veterans under Public Law Nos. 16 and 346. Veterans will be admitted on the basis of their high school record or upon results of the General Educational Development test scores. Credits will be allowed for educational experiences in the armed forces as recommended by the American Council on Education.

Veterans wishing to have their military experiences evaluated should file their records with the Registrar. Additional information concerning the rights and privileges accorded to veterans can be secured from the Registrar.

REGISTRATION

Students should register on or before the time set in the calendar as final registration.

Fees must be paid at the time of registration. No student will be permitted to attend classes until all fees have been paid.

Freshmen will not be permitted to carry more than seventeen hours per quarter. Sophomores with an average of "B plus" in all courses previously carried may enroll for additional hours with the permission of the Dean.

Students who are doing considerable outside work are advised to cut down the number of hours for which they register. If it is evident that a student is jeopardizing his scholastic success, he will not be permitted to carry a full course.

CHANGE OF REGISTRATION

A change of registration can be made only with the consent of the instructor and the Registrar. All changes must be made not later than the end of the second week of the quarter.

EXAMINATIONS

Students wishing junior college credits must pass final examinations at the end of each quarter. Permission to take final examinations in advance must be given by the Dean. Re-examinations are not given except as a means of removing an incomplete grade.

REQUIREMENTS FOR GRADUATION

The Centralia Junior College awards an Associate of Arts Diploma upon the completion of 90 approved hours of credit in academic subjects with a grade index of 2.00 (C average). To be eligible to secure this diploma the candidate must also have settled all financial obligations with the Junior College and must be in attendance at the commencement exercises of his class.

SYSTEMS OF GRADES

Final grades are issued at the end of each quarter as follows:

A—Superior scholarship	D—Passing scholarship
B—Good scholarship	E—Failure
C—Average scholarship	I—Incomplete
W—Withdrawn	

SYSTEM OF HONOR POINTS

In addition to the final quarter grades, a system of honor points is used to determine the student's general standing. These honor points are estimated as follows:

A—4 honor points per credit hour
B—3 honor points per credit hour
C—2 honor points per credit hour
D—1 honor point per credit hour
E—0 honor points per credit hour

The student's grade index may be computed by dividing the total number of honor points by the hours of credit earned.

INCOMPLETE

An incomplete will be given only in case the student has been in attendance and has done satisfactory work to within two weeks of the close of the quarter. An incomplete is convertible into a passing grade only during the next quarter of attendance, provided the work of the course has been satisfactorily completed.

WITHDRAWAL

No student may drop a course without the consent of the Dean. During the first four weeks of the quarter a student may withdraw from a course and be given a grade of "W." If he desires to withdraw at a later period, he may do so at any time prior to the last two weeks of the quarter. If his work has not been satisfactory, he will be given an "E" instead of a "W."

HONORABLE DISMISSAL

To be entitled to honorable dismissal, a student must have satisfied all obligations to the college and have a satisfactory record of conduct. Students failing to obtain honorable dismissal will not be recommended to another institution.

FEEES

Associated Student Body Fee: \$5.00 per Quarter

General Fees:

Registration for 5 hours credit, \$10.00 per Quarter

Registration for 6 to 10 hours credit, \$20.00 per Quarter

Registration for 11 or more hours credit, \$25.00 per Quarter

Non-Resident Fee: \$30.00 per quarter

This non-resident fee is charged each non-resident student irrespective of the number of hours credit registered.

Health Fee: \$5.00 per Quarter

This health fee entitles each student to certain medical care and hospital services by the doctors in Lewis County under the auspices of the Lewis County Medical Service Incorporated. Details concerning services available may be secured at the Junior College office.

Laboratory Fees:

Anatomy	\$2.50 per quarter
Bacteriology	5.00 per quarter
Botany	2.50 per quarter
Chemistry	5.00 per quarter
Engineering	2.50 per quarter
Physics	2.50 per quarter
Physiology	2.50 per quarter
Zoology	2.50 per quarter

Applied Music: \$35.00 per Quarter

Individual instruction in piano, voice, violin, organ and other instruments as can be arranged for.

REFUNDS

Students who withdraw for satisfactory reasons may, on written application to the Board of Education, receive a refund according to the following plan:

Associated Student Body Fee, non-refundable for any reason.

General Fee, Non-Resident Fee and Laboratory Fees.

Withdrawal within five days of the opening of the quarter, 100% refund.

Withdrawal after five days and before the expiration of twenty school days, 50% refund.

Withdrawal after twenty days of the opening of the quarter, no refund.

ATTENDANCE

Prompt and regular attendance at classes is required. In case of sickness or other justifiable reason for non-attendance, as many absences as there are credit hours in the course may be allowed. Students who exceed that number will have an hour or more of credits deducted from the college credits earned. In cases of protracted illness, absence may be excused upon satisfactory completion of the work.

STUDENT COUNSELING PROGRAM

Certain faculty members are specifically assigned to help students make successful adjustments to college life and to guide them in planning their future educational and vocational careers. The Dean of the College, the Counselor for Women, the Counselor for Men, and the Registrar give much time to counseling students. In addition, each faculty member is ready to bring his training and experience to bear on specific personal problems of students.

HOUSING

A faculty member has been given the responsibility of preparing a list of places where students may obtain room and board or a list of suitable rooms, apartments, and houses available for rental to students. Lists of these accommodations may be obtained in the college office.

TEXTBOOKS

Textbooks are ordered through the local book stores. Enterprising students, however, may secure used books from students who have already completed their courses.

STUDENT ORGANIZATIONS

ASSOCIATED STUDENTS

Every student enrolled in the Centralia Junior College is a member of the Associated Students.

A Student Council, consisting of the usual student officers, the president of the various organizations, and faculty advisers, directs all student body activities. Student funds are budgeted to cover the athletic program, formal and informal dances, a Christmas party, the annual trip to Mt. Rainier, and a dinner dance in the Spanish Ballroom of the Lewis-Clark Hotel.

MEN'S CLUB

During the college year those activities which are of interest to men students, only, are arranged and controlled by the Men's Club, of which all men students are members. Outstanding activities are the Field Day on Noble Field, the Thanksgiving turkey shoot, the annual dinner at which athletic awards are made, and the fishing derby at Summit Lake.

CO-ED CLUB

Every girl upon enrollment in the Junior College becomes a member of the Co-Ed Club, which has to do with activities which concern only the girls of the college. Some sort of social gathering is held each month. These affairs vary in nature from a formal dinner in November and a Tolo dance in March, to potluck dinners in the winter and a picnic in the spring. One of the major activities is a tea-dance in the spring for senior girls of the Centralia and Chehalis High Schools.

THE JAY SEER

A mimeographed newspaper, the JAY SEER, is published every two weeks. Typists and artists as well as those students interested in writing are encouraged to join the staff.

THE YEARBOOK

The students publish a yearbook each year which summarizes the activities of the year. Opportunity is given to all students to work on the publication.

MUSICAL GROUPS

The college provides opportunity for work in chorus and band, and in ensemble groups, both vocal and instrumental.

DRAMA

A Dramatic Club and all-college play give ample scope for those interested in acting or play production.

FORENSICS—PHI RHO PI

Students interested in public speaking are offered experience in debate, oratory, extempore, and after-dinner speaking. Those who qualify take out-of-town trips to compete in inter-collegiate speech tournaments. For meritorious work in either intercollegiate competition or community speaking, students are honored by memberships in Phi Rho Pi, national junior college speech honorary.

RADIO

A series of radio programs given with the co-operation of KELA provide valuable training and experience for those interested in broadcasting.

Informal
Dance

Individual

Lab

ATHLETICS

Centralia Junior College athletic teams participate in regularly scheduled contests with other member teams of the Washington State Junior College Athletic Conference. Sports include: Football, basketball, baseball, track, tennis and golf. All athletic contests are conducted under the rules of Washington State Junior College Athletic Code.

DER DEUTSCHE VEREIN

All German students and others interested in the German language, history, customs and culture are eligible to become members of the German Club. Meetings are held twice a month with planned programs for entertainment, conversation and study.

ASSEMBLIES

Assemblies are called for the discussion of student affairs or for the presentation of student or outside talent. Students are required to attend all scheduled assemblies.

SOCIAL AFFAIRS

Special affairs are planned and carried out by the students as occasions arise. Throughout the year informal dances are also held in Blazer Hall for all students desiring to attend.

ANNOUNCEMENT OF COURSES

As the first two years of college work are general in character, the subjects given in any course during these two years are in the College of Liberal Arts and Science. With wise choice in selecting subjects, one may pursue his specialty at a university without any loss of time or credit.

No student, however, should attempt to plan his course without consulting the bulletins of information issued by the various colleges or universities concerning the requirements of the department he wishes to enter.

Registrars of colleges and universities are always glad to furnish circulars of information and other data concerning required courses.

The regular academic courses at the Junior College are designed to meet the requirements of the first two years of general college work.

CURRICULA

The following are outlines of programs of study for students in the major fields of interest at the college. A very few of them have to be followed exactly because of the demands of the particular profession or semi-profession. Most of them, however, are suggested to guide the student and may be changed to fit the time schedule of classes for the year and to meet the special interests of the student. No change should be attempted, however, without consulting a faculty advisor in the major field of study. If the curriculum is preparatory to advanced work at another college, the catalog of that college should be read carefully to determine whether its entrance requirements are properly met and whether the courses appropriate to the first two years are scheduled. In each curricula listed below a student is required to take Physical Education activities during each quarter. Physical Education 10 (Personal Hygiene) must be studied during any one quarter of the freshman year.

DESCRIPTION OF COURSES

The Junior College reserves the right to withdraw any course or courses for which there is not adequate enrollment.

The Junior College will include any subject for which there is sufficient demand.

The description in each department includes:

1. The number of the course used in the Junior College records.
2. The title of the course
3. Prerequisites
4. A statement of subject matter
5. Credits
6. Quarter given

Two or three numbers connected by hyphens indicate a course which ordinarily carries credit only when pursued for the full time. No credit in a beginning foreign language is given for less than two quarter's work.

ART

Courses are planned to give the student basic design techniques and handling of materials for future commercial and hobby needs.

1. Pen and brush lettering, paper construction work, pastel painting and some basic design problems. Five credits: fall.
2. Poster layout and design using various techniques, some block printing. Five credits: winter.
3. Craft course including beginning ceramics, metal tooling, plaster work, textile painting and as many others as possible. Five credits: spring.

BACTERIOLOGY

1. General Bacteriology. An introductory study of the principles and techniques of microbiology. Lectures include a survey of the historical development of bacteriology; the taxonomy, morphology, chemical reactions and energy relations of bacteria; sterilization and disinfection practices and a survey of the pathogenic families of bacteria. Laboratory includes staining techniques; oil immersion examination of type forms; culture methods using agar, broth, gelatin, potato and milk media to determine the growth characteristics of ten different species of non-pathogenic bacteria, and pure culture isolation. Prerequisite, 2 quarters of a laboratory science. Five hours credit: spring.

BOTANY

1. Elementary Botany: A study of the structure of roots, stems, leaves and flowers; elementary plant anatomy and physiology. Three lectures and four hours of laboratory a week. Five credits: fall.

2. Elementary Botany: (Continuation of Botany 1). The morphology of representative plants in all divisions of the plant kingdom. Five credits: winter.

3. Systematic Botany: The identification and classification of flowering plants representative of the major ecological zones of the state. Five credits: spring.

11. Plant Ecology: A consideration of the effect of environment on plant succession and survival; the factors which determine the vegetative types throughout the world. Prerequisite Botany 1 and 2. Three lectures and four hours of laboratory a week. Five credits: winter.

12. Forest Botany: Identification of Browse toxic and grass like plants. Prerequisite Botany 2. Five credits: spring.

BUSINESS LAW

1. Business Law—An introduction to the law pertaining to the rights of property and the regulation of persons engaged in commerce. Five credits: winter.

2. Business Law—Continuation of Business Law 1. Five credits: spring.

CHEMISTRY

1-2. General Inorganic Chemistry—This course is planned to give the student a more thorough knowledge of the material world, of the changes in the composition of matter, and of the forces producing them. It also furnishes the training in general chemistry required by those who wish to major in Chemistry or for such professions as Medicine and Engineering. Five credits a quarter: fall and winter.

3. Elementary Qualitative Analysis—Prerequisite, Chemistry 2. A study of the properties and methods of identification of common metals and acid radicals. Five credits: spring.

11. Organic Chemistry—Prerequisite, Chemistry 2. A study of the compounds of carbon. Five credits: fall.

12. Organic Chemistry—Continuation of Chemistry 11. Five credits: winter.

13. Organic Chemistry—Continuation of Chemistry 12. Five credits: spring.

15. Quantitative Analysis—A study of gravimetric and volumetric analysis. Prerequisite, Chemistry 3. To be offered spring quarter if sufficient demand. Five credits.

ECONOMICS AND BUSINESS

1. General Economics—This course treats of the general characteristics of the present economic system and shows how it has developed through various stages. Five credits: fall.

2. General Economics—A continuation of Economics 1, with the discussion of special economic problems. Five credits: winter.

3. Geographic Background of Industry—A study of the political divisions and their relation to world commerce and trade routes. A survey of the geographical distribution of the world's agricultural and mineral resources. Five credits: spring.

11. Principles of Accounting—A study and application of the fundamental theory of accounts as applied to single proprietorship and partnership. Five credits: fall.

12. Principles of Accounting—Accounting theory applied to corporations, branch accounting, manufacturing accounting, etc. Prerequisite, E. and B. 11. Five credits: winter.

13. Business Statistics—The compilation and study of business data as applied to practical business and economic conditions. Prerequisites E. and B. 11-12. Five credits: spring.

14. Business Organization—A general introduction to the field of business, including types of business ownership, functions of businesses, types of organization, etc. Prerequisites, E and B. 11 and 12. Five credits: fall.

15. Marketing—An introduction to the principles, methods, and organizations of our marketing system. Prerequisites, E and B. 11, 12, and 13. Five credits: winter.

16. Money and Banking—A historical development of money with special emphasis upon the theory and mechanics of present-day money practices. Prerequisites, E. and B. 11-12. Five credits: spring.

ENGINEERING

The junior college offers courses in Engineering Problems, Surveying, and Drawing. Prerequisite, Advanced Algebra, Solid Geometry, and high school Physics. While the junior college supplies a large share of the equipment, the student will find it necessary to secure a drawing set, a slide rule, and the individual's paper and books.

1. Engineering Drawing—Fundamental principles of orthographic projection; lettering, should be preceded by or accompanied by Solid Geometry. Three credits: fall.

2. Engineering Drawing—Reading and execution of working drawings. Prerequisite Engin. 1. Three credits: winter.

3. Drafting Problems—Descriptive Geometry. Three credits: Spring.

11. Engineering Problems—Orientation course; training in methods of analyzing and solving engineering problems. Deals principally with dynamics. Prerequisite H. S. Physics, Adv. Algebra. Three credits: fall.

12. Engineering Problems—Analytical and graphical statics. Pr. Engineering, 1, 11 and Math. 3. Three credits: winter.

21. Plane Surveying—Methods, use of instruments, computations, mapping, U. S. Public Land Survey. Prerequisite, Engineering 1, 2 and Math. 3. Three credits: spring.

101a. D. C. Circuits—A study of direct current theory, including Ohm's Law, Kirchoff's Law, Thevenin's Theorem, Superposition Theorem and effects of temperature. Prerequisite, Math 5. Two credits: fall.

101b. D. C. Circuits—Continuation of Engineering, 101a. Two credits: winter.

101c. D. C. Circuits—Continuation of Engineering 101b. Verification of basic laws developed in Engineering 101a and 101b. Operation and study of direct current machinery and instruments. Four hours laboratory per week. One credit: spring.

ENGLISH

1. Composition—Fundamentals of grammar, practice in expository writing and principles, and practice of oral communication. Individual conferences. Five credits: fall.

2. Composition—Continuation of English 1 with emphasis upon the methods of collecting and organizing material for a research paper. Individual conferences. Five credits: winter.

3. Argumentation—The principles of argumentation, elementary

logic, analysis, the use of evidence and the discovery of fallacies. Five credits: spring.

5. Business English—Business letters; analysis of principles, development of judgments of points of business policy. Primarily for students in business administration. Prerequisite, English 1. Five credits: fall.

11. Literary Backgrounds—A study of 8 or 10 of the chief English authors from the beginnings of English literature to the middle of the 18th century. Five credits: fall.

12. Literary Backgrounds—Continuation of English 11—Begins with the middle of the 18th century and continues the study to the present. Five credits: winter.

13. Literary Backgrounds—Continuation of English 12—Nineteenth Century English novel. A comprehensive survey of the development of the English novel during the nineteenth century with special attention given to outstanding novelists of the period including a detailed analysis of the social, political, and economic background and plot structure of characteristic productions of each writer. Five credits: spring.

14. Introduction to Shakespeare—A survey of biographical data, the Elizabethan theater, and a detailed study of representative plays. Five credits: spring.

15. Introduction to Modern Literature—Essays on European and American thought accompanied by readings in poetry, novel, and drama. Five credits: winter.

15. European Literature—A general course in European literature for students who have not read a great deal, or who wish a general knowledge of world masterpieces. Five credits: spring.

17. American Literature—A study of representative prose and poetry from Franklin to Whittier. Five credits: winter.

18. Continuation of English 17—A study of selected prose and poetry from Poe to the present time. Five credits: spring.

FOREIGN LANGUAGES

Students presenting two years of foreign language select course 4, as first year college work.

FRENCH

1-2-3. Elementary French—The aims of these courses are to lay the foundation for good pronunciation and to provide a reading and speaking knowledge of the French language. Grammar will be studied the first two quarters and will be supplemented by the reading of simple material the third quarter. French will be used as much as possible in the classroom. Daily, five credits a quarter: fall-winter-spring.

4-5-6. Advanced French—Reading of modern texts. This course includes a review of grammar, a brief survey of French literary movements from the seventeenth to the nineteenth centuries, and reading of examples of the writings of outstanding authors of the nineteenth century. French will be used as much as possible in the classroom. Daily, five credits a quarter: fall-winter-spring.

GERMAN

1-2-3. Elementary German—Grammar, composition, translation, pronunciation and conversation. Reading of novelettes and short stories. Daily, five credits per quarter: fall-winter-spring.

4-5-6. Advanced German—Review of grammar, composition and conversation. Reading from Goethe, Schiller, Lessing and modern novels and dramas. Daily, five credits per quarter: fall-winter-spring.

SPANISH

1-2-3. Elementary Spanish—A study of the fundamentals of Spanish grammar, with practice in conversational Spanish, and the reading of a considerable amount of Spanish. Five credits a quarter: fall-winter-spring.

4-5-6. Advanced Spanish—Advanced grammar, composition, and conversation. Reading examples of the writings of outstanding authors. Five credits a quarter: fall-winter-spring.

FORESTRY

1b. Dendrology—Identification of the Deciduous forest trees and a study of their distribution. Two lectures and four hours laboratory a week. Three credits: fall.

1a. Dendrology—The identification of the North American coniferous trees and a study of their distribution. Three credits: spring.

2. General Forestry—An introduction to American Forest. An orientation course supplemented by visits to pulp mills, Forest Nursery, State Fire Hall and logging operations. Three lectures a week. Three credits: fall.

4. Forest Fire Protection—A study of forest fires, their causes, detection and effects; pre-suppression and suppression methods. Three lectures a week. Three credits: winter.

HISTORY

3. Medieval History—A general survey of medieval times from Germanic migrations to the opening of the modern period, emphasis being placed upon social and economic factors rather than upon strictly chronological events. Five credits: fall.

4. Modern European History—The development of European history from the year 1500 A.D. to the present, covering particularly important social and economic factors. Five credits: winter.

5. English Political and Social History—A study of the growth of the English nation, the formation of the Constitution, and the religious, commercial and industrial revolutions. Five credits: spring.

11. U. S. History—(Open to sophomores only)—From the discovery of America to the Civil War. An economic and sociological interpretation of the Colonial Period, the establishment of the National Government, the rise of political parties, national expansion and development, the extension of suffrage, the slavery question, and certain phases of the Civil War. Five credits: fall.

12. U. S. History—(Open to sophomores only)—From the Civil War to the present time. A study of the problems of reconstruction, westward expansion, immigration, capital and labor, and international relationships. A study of the World War and its economic world-wide effects are included. Five credits: winter.

MATHEMATICS

1. Intermediate Algebra—Course is intended for those who have had only one year of high school Algebra. It begins with the fundamental operations and continues through logarithms. (Will be offered each fall quarter when there is sufficient demand.) Five credits: fall.

2. Solid Geometry—Prerequisite, one and one-half years of high school Algebra and one year of Plane Geometry. (Will be offered each winter when there is sufficient demand.) Five credits: winter.

3. Plane Trigonometry—This course deals with the functions of acute and obtuse angles, solution of right and obtuse triangle, functions of multiple angles and trigonometric identities, equations and curves. Prerequisite, one and one-half years of high school Algebra and one year

of plane Geometry. Five credits: fall.

4. College Algebra—A short review of the fundamental processes of Algebra precedes a study of quadratics, mathematical induction, theory of equations, probability, determinants and series. Prerequisite, one and one-half years of high school Algebra or Mathematics. Five credits: winter.

5. Analytical Geometry—A study of coordinate systems, straight lines, conic sections, loci, graphs, etc. Prerequisites, Mathematics 3 and 4. Five credits: spring.

11. Differential Calculus—A study of the differential calculus with emphasis on application combined with rigor. Prerequisite, Math. 5. Five credits: fall.

12. Integral Calculus—A study of the integral calculus, including multiple integrals and applications. Prerequisite Math. 11. Five credits: winter.

13. Integral Calculus—A study of ordinary differential equations, hyperbolic functions series, partial differentials, advanced applications of integral calculus. Five credits: spring.

MUSIC

1. Music Theory—Elementary harmony structural and physical basic scales, intervals, chords in major keys, improvisation and transposition of simple melodies, melodic dictation and key-board drill. Class meets daily. Three credits: fall.

2. Music Theory—Elementary harmony structural and physical basis of chords. All primary harmonies and non-harmonic tones. Prerequisite, Music 1 or equivalent. Daily, five credits: winter.

3. Music Theory—Elementary harmony structural and physical basis Five credits: spring.

5. Introduction to Music, Literature and History—Technique of listening and of using reference materials in relation to concert programs. Class meets three times per week. Three credits: fall.

6. Music History and Appreciation—continuation of Music 5 up to 1850, including Beethoven, Brahms and Wagner. Three credits: winter.

7. Music History and Appreciation—Continuation of Music 6. Three credits: spring.

10-11-12. "The College Singers." Prerequisite, try-out or permission. A picked group, trained for concert work, using the finest literature in choral field. Primarily a performance group. Opportunity will be given in conducting to the more advanced students. One credit: each quarter.

15-16-17. Band. A performance group, trained in marching problems and also using the best of band literature. Opportunity will be given in conducting to the more advanced students. One credit: each quarter.

21-22-23. Applied Music. Private instruction in applied music will be available to students through the college. Inquire at the college office for details and names of approved instructors.

PHILOSOPHY

1. Introduction to Philosophy—An introduction to philosophical thought, with attention focused on man and his progress, on the individual and the good life and its problems, and on the nature of reality. Five credits: fall, winter and spring.

PHYSICAL EDUCATION FOR MEN AND WOMEN

Physical education classes are conducted for both men and women. Emphasis is placed on the regular participation in healthful activities which will develop individual skills and aptitudes for sports, and which will provide the skills and techniques of organized team activities.

1-2-3. Activities—Gymnastics, games and sports to meet the needs of the individual. One credit: each quarter.

10. Personal Health—Health information that affords a basis for intelligent guidance in the formation of health habits and attitudes. Given each quarter. Required by all Freshmen. Two credits: spring.

PHYSICS

1. General Physics—A study of Mechanics and Heat. Three hours laboratory per week. One tutorial section per week. Five credits: fall.

2. General Physics—A study of Light, Sound and Wave Motion. Three hours laboratory per week, one tutorial section per week. Prerequisite, Physics 1. Five credits: winter.

3. General Physics—A study of Electricity, Magnetism and Modern Physics. Three hours laboratory per week, one tutorial section per week. Prerequisite, Physics 1 and 2. Five credits: spring.

PHYSIOLOGY

1. Physiology—Introduction to Human Physiology. An elementary study of the metabolic processes of the normal body with special reference to the chemistry involved. Three lecture periods and four hours of laboratory a week. Five credits: spring.

POLITICAL SCIENCE

1. Comparative Government—A study of the origin and development of the state; its organization, functions and chief problems, with emphasis on the study of the governments of the United States, England, France, Germany, Italy and Switzerland. Five credits: spring.

3. Political Theory—A study of political theories of the Western World; the concept of the state; the relationship of the state and the people; the power of governments; the rights and duties of citizens. Daily, five credits: spring.

5. American Government—The organization and function of our government with special emphasis on the place of local, state and federal agencies. Daily, five credits: spring.

PSYCHOLOGY

1. General Psychology—A survey of the science as a whole; the study of man's original nature; the way in which nature is altered by use, and the common modes of individual and social behavior that result. Five credits: fall-winter.

5. Psychology of Adjustment—A study of the common individual and social adjustment problems of normal people. Five credits: winter and spring.

SCIENCE

1. Survey of Biological Sciences—Introduces the student to the major taxonomic groups of animals and plants. Five credits: fall.

2. Survey of the Physical Sciences—The student is introduced to the types of machines man has found useful and to the principles which govern the use of these machines. Five credits: winter.

SECRETARIAL TRAINING

1-2-3. Elementary Typing—Fundamental principles of the touch system; designed to provide enough practice so that student may use typewriter for his own purposes. Five hours terminal credit each quarter: fall-winter-spring.

4-5-6. Elementary Shorthand—Theory of Gregg Shorthand. Sec. Tr. 1, 2, 3, should be taken concurrently with Sec. Tr. 4, 5, 6, unless student has had the equivalent. Five hours terminal credit each quarter: fall-winter-spring.

7-8-9. Advanced Typing—An advanced course designed to develop greater speed and accuracy. Prerequisite, at least one year of typing. Five hours terminal credit each quarter: fall-winter-spring.

10-11-12. **Advanced Shorthand**—A thorough review of the Gregg manual; advance phrase-writing and shortcuts. Prerequisite, Sec. Tr. 1, 2, 3 and 4, 5, 6 or their equivalent. Five hours terminal credit each quarter: fall-winter-spring.

13-14-15—**Bookkeeping**—Fundamental principles of bookkeeping. Course is designed to give students a knowledge of fundamental Bookkeeping procedures. Five hours terminal credit each quarter: fall-winter-spring.

16. **Office Procedure**—Prerequisite: Advanced Typewriting and advanced Shorthand. Training and practice in the most efficient stenographic methods and office practices; office dictation; handling mail; reports; modern office methods; secretarial ethics. Five hours terminal credit: spring.

SOCIOLOGY

1. **Introduction to Sociology**—A study of man in relation to his fellow-man involving social reform, environmental and hereditary problems, the problem of social and mental misfits, personal freedom versus law, the working condition and wages of laborers, and their effects on society. Five credits: spring.

SPEECH

1. **Fundamentals of Speech**—A study of the fundamentals of effective speaking; voice, bodily action, thought organization, audience analysis and response. Through the presentation of speeches in class the student lays the foundation for the skills he will need in real speech situations. The principles studied are basic to every form of oral communications—informal speech, public speaking, radio and theater. Five credits each quarter.

2. **Public Speaking**—A course designed to give the student further training in the preparation and delivery of speeches for various and special occasions. Emphasis is placed upon the factors of attention and motivation and upon the selection of materials suited to the audience and the occasion. From speeches of courtesy, goodwill and tribute he learns how to preside over a meeting and to introduce speakers. Prerequisite, Speech 1. Five credits: winter.

3. **Discussion and Debate**—Discussion and debate are the methods by which the many clubs, societies, and legislative groups in our democracy solve their problems and formulate group policy. This course is planned to train the student for effective participation in the discussion groups to which he will belong. Careful analysis, objective thinking, validity of proof, and persuasive speaking are stressed. Five credits.

ZOOLOGY

1. **Elementary Zoology**—Fundamental principles of Biology, the life functions, classification and morphology of representative animals of the animal kingdom. Three lectures and four hours of laboratory a week. Five credits: fall.

2. **Elementary Zoology**—(Continuation of Zoology 1).—The development of vertebrate animals with special reference to structure. Prerequisite Zoology 1. Five credits: winter.

3. **Evolution, Genetics and Eugenics**—A resume of the eras of the earth's history and the typical life forms of each; a study of the laws governing inherited characteristics and the application of these laws to selective breeding in plants and animals; and introduction to human genetics. Five lectures a week. Five credits: spring.

11. **Comparative Embryology**—A study of the embryological processes

Field
Trip

of the Vertebrates. Lectures include a discussion of the reproductive rhythms; development and function of the embryological membranes and organogenesis starting with the zygote and continuing to the definitive organs, complete in structure but fetal in size as found in typical chordate groups. Laboratory consists of gross and microscopic study of Vertebrate eggs, spermatozoa, and embryos as found in the fish, frog, chick and the pig. Designed for Zoological majors, pre-med and pre-dental students. Prerequisite, Zoology 1 and 2. It is recommended that this course follow Zoology 12 and 13. Five credits: spring.

12-13. Comparative Anatomy—A study of the anatomical relationships of the Chordates. Lectures consist of a discussion of the taxonomy of the Chordates and consideration of the homologies and analogies of anatomical systems of the Chordates. Laboratory consists of the dissection and demonstration of each anatomical system of the Dogfish Shark, Necturus, and the Cat. Designed for Zoology majors, pre-med and pre-dental students. Prerequisite, Zoology 1 and 2. Five credits: fall and winter.

TIME SCHEDULE

A time schedule of all College Classes will be made at the beginning of each quarter and will be mailed upon request.
